NASH

NASH BROTHERS
CONSTRUCTION CO., INC.

120 YEARS OF EXCELLENCE

Employee of the month—Dan Passarello

Dan Passarello began working at Nash Brothers in 2005. Dan continually showed a desire to learn from those around him and to perform work carefully. He was promoted to the position of foreman during 2014.

Dan believes the most challenging part of his job is making certain that all material and equipment is organized for each project and that his job site and crew are in compliance with safety regulations from the beginning to the end of a project.

Dan enjoys working outside and visiting different neighborhoods.

Dan's words of advice to those beginning in the field would be, "Don't be afraid to ask questions."

In his free time, Dan enjoys playing golf and reading.

A little known fact about Dan: He played football in college.

We are glad to have Dan with us at Nash Brothers!

Safe Summer Driving

Recently, the Nash Brothers' foremen gave the following Toolbox Talk. As many plan driving trips this summer, the following information is good to remember and to practice! Dangers of drowsy driving may be slow speed, slow reaction time, tail gating, missing traffic signals, or driving off the road. Turning up the radio volume, eating or chewing gum, opening a window, or getting out of the car to walk or stretch only work for a short while. The only real solution is to get off the road and to sleep. Safe travels to all from the team at Nash Brothers.

Safety News

Nash Brothers has worked 634 days injury free. There are no OSHA recordable incidents or motor vehicle incidents. Nash Brothers has been event free for 282 days.

After School Matters Internships

Nash Brothers welcomes Kasen Pierce and Tyree Wooding as interns this summer! Tyree graduated from Orr Academy and his favorite subjects are Algebra and Spanish. While at Nash Brothers, Tyree hopes to learn different components of effectively running a business. He also will like to develop customer service skills while working with a team. Tyree is majoring in business at Jackson State University.

Kasen attended Providence St. Mel High School and his favorite subject is Calculus. During his internship, Kasen hopes to learn how a construction company operates and to learn about the engineering component of underground construction. Kasen will be attending Bradley University beginning in the fall.
