120 YEARS OF EXCELLENCE

Safety in the Field

What We have Learned

We went to visit several job sites during this month. Before we could go into the field, we were shown a safety video and Michele Kryszak discussed safety protocol with us. We watched a video which explained important rules to follow on any job. We saw repair jobs along a 138KV ComEd electrical line. To get to these lines, laborers had to excavate and to shore trenches to create a safe work environment. The foreman explained to us the importance of proper shoring and the importance of following all safety guidelines.

Safety Brief

Nash Brothers has worked 655 days injury free. There are no OSHA recordable incidents or motor vehicle incidents. Nash Brothers has been event free for 303 days.

After School Matters Internships

I am Tyree Wooding, summer intern for Nash Brothers Construction. I recently graduated from Orr High School. My hobbies are basketball and music. I will be attending Jackson State University to major in business accounting. My career goal is to become an entrepreneur and to own my own business. I have learned that everyone has their own role to play and that is key to making a business work.

Employee of the month— Ken Slavicek

Ken Slavicek began working at Nash Brothers in 2000. Ken started as a mechanic and is now a backhoe operator.

Ken offers these words of advice to those looking to start in the field: “Stop, look, listen , and most importantly, be safe.”

Ken likes to work outside. He enjoys spending time outdoors and appreciates nature. In his spare time, Ken coaches a girls’ softball team.

I am Kasen Pierce, an intern at Nash Brothers this summer. I graduated from Providence St. Mel High School. I plan on attending Bradley University in the fall to study computer science. My career goal is to become a system security analyst. Working at Nash Brothers has taught me about how complex running a business can be and how all employees play a key part in making the business successful.
